The reality of multi-cloud

Today's top hybrid cloud challenges

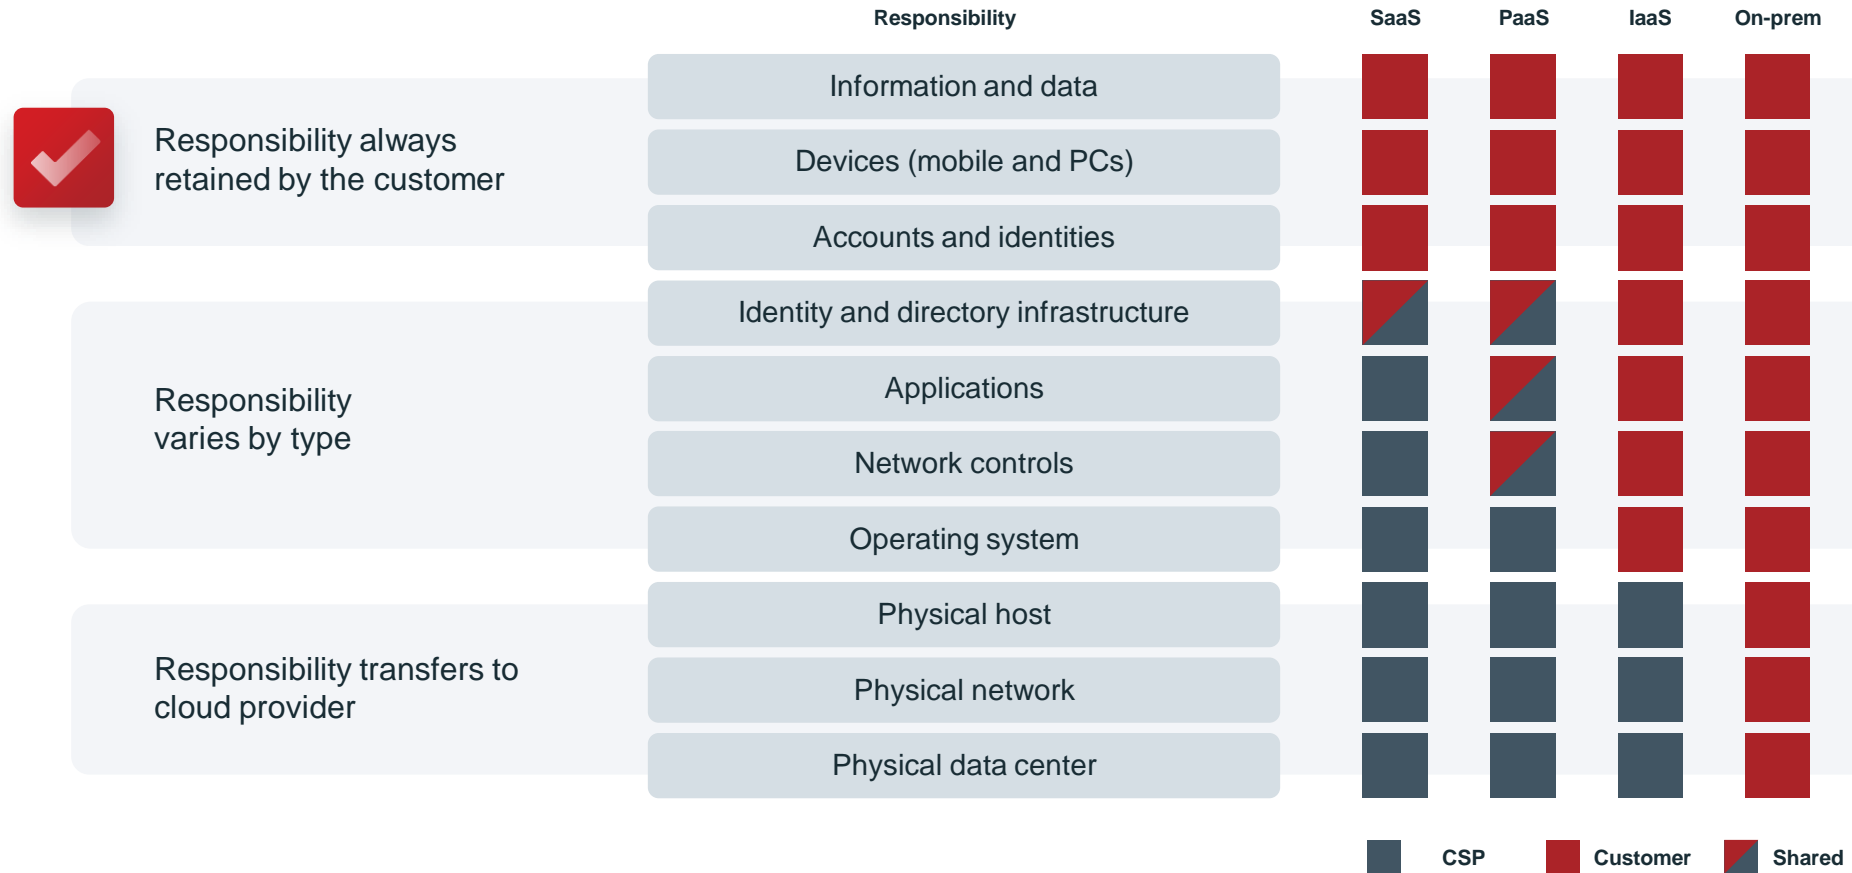

What's stopping organisations from realising the promise of cloud?

Your data remains your responsibility in the cloud

Cloud Shared Responsibility Model

Cloud Data Management Platform

Data Protection

Provides Unmatched Ransomware Resiliency

Data Compliance & Governance

Illuminates and Remediate Information Risk

Application Resiliency

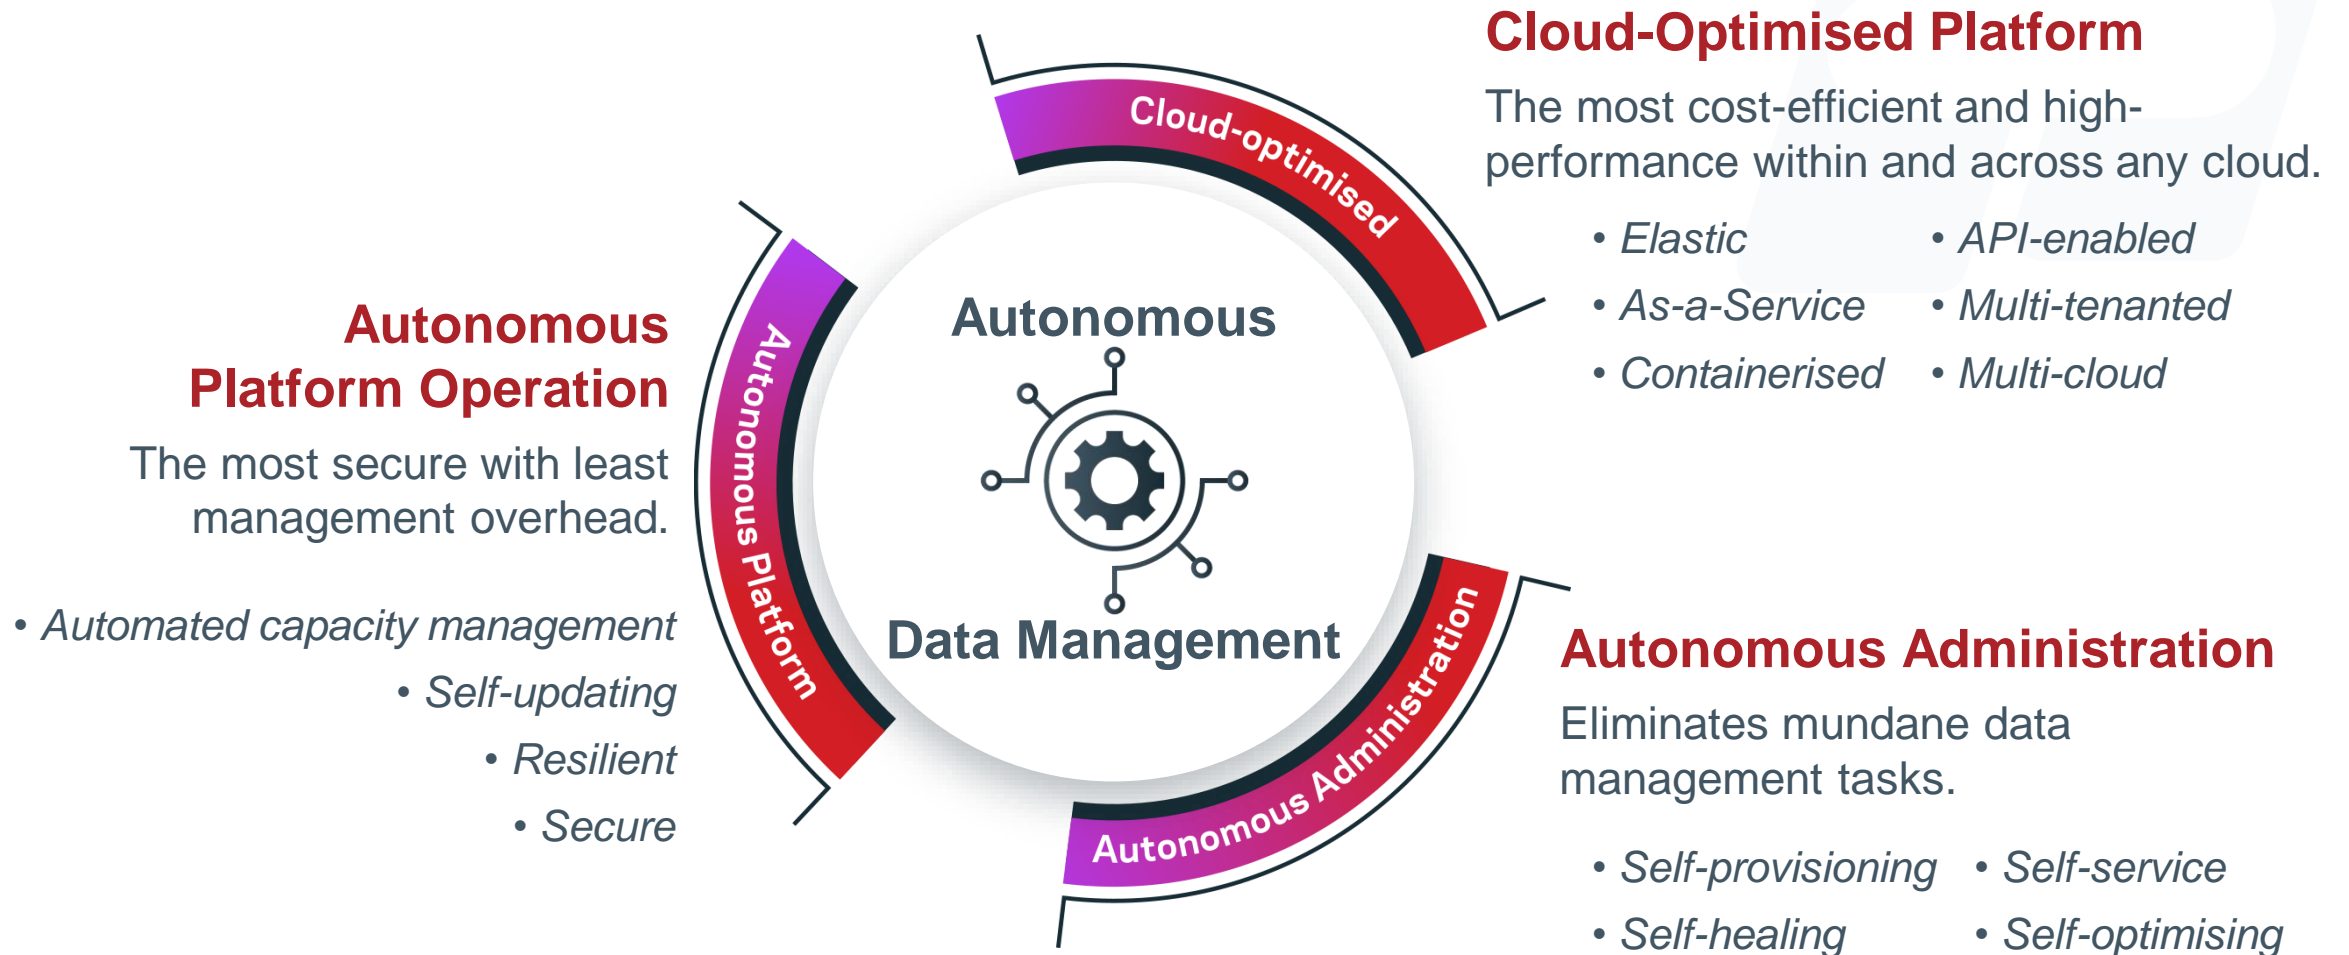

Powers the Always On Business

Elastic Data Management with
Cloud Scale Technology

Unique Single
Management Console

Proven most secure
architecture

Veritas' Vision: addressing cloud adoption barriers with Autonomous Data Management

Cloud Data Management Platform

Control of all your data
protection and application
resiliency in the cloud.

- As-a-service, cloud native solutions, built for any environment (multi, hybrid, private, edge, on-prem)
- Flexible consumption model, easy to implement and provision
- Enterprise scale with optimal cloud resource usage (dedupe, autoscaling)
- Purpose-built for modern workloads like K8s, PaaS, IaaS
- Operationally simple, with intuitive UIs; but not at the expense of control
- API-driven for integration and automation
- Reliability at scale from a proven, trusted vendor

Data Protection

- Protect, Access, Utilise Data
- Automated, Flexible Recovery
- Intelligent Visibility / Observability

Provides Unmatched Ransomware Resiliency

Application Resiliency

- Ensure Performance
- Application Availability
- Cross-Cloud Mobility

Powers the Always-On Business

Data Compliance & Governance

- Capture and Visualise Everything
- Archive Anywhere
- Discover What Matters

Illuminates and Remediates Information Risk

Data Protection

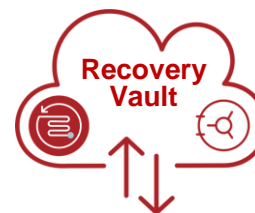

Alta Data Protection

- Cloud-native architecture
- Broad cloud workload support
- Ransomware resilient
- Unified data protection
- Cost-optimised

Alta Recovery Vault

- Highly efficient cloud data store with global deduplication
- Air-gapped ransomware protection with immutable storage
- Recover anywhere – on-premises or in the cloud
- Predictable costs

Alta SaaS Protection

- Backup as a Service for M365 and other SaaS workloads
- Enterprise-grade performance
- Highly secure
- Helps optimise M365 costs
- Deploy in any tenant

Alta View

- SaaS-based backup management platform
- Single pane of glass to manage across multiple cloud and on-premises backup environments
- Global policy, jobs and event management

Coming Soon!

Application Resiliency

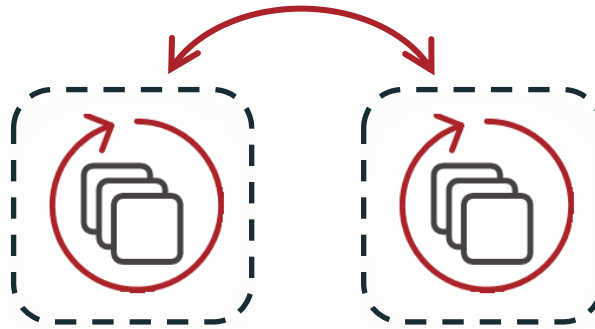

Migrate critical applications to, from and between clouds

- Application-level orchestration
- Cloud agnostic support
- Data portability
- Non-disruptive testing

Assure IT service resiliency & disaster recoverability

- Granular application visibility & control
- Real-time fault detection
- Automated recovery orchestration
- Local, stretched or global architecture

Deliver improved cost / performance ratio

- Accelerated application performance
- Optimised use of cloud storage resources
- Non-disruptive online storage management

Data Compliance & Governance

Full visibility into your unstructured data

- Visualise and classify all your unstructured data across multiple data stores
- Detect & report anomalies & risk conditions

Comprehensive data archiving & retention

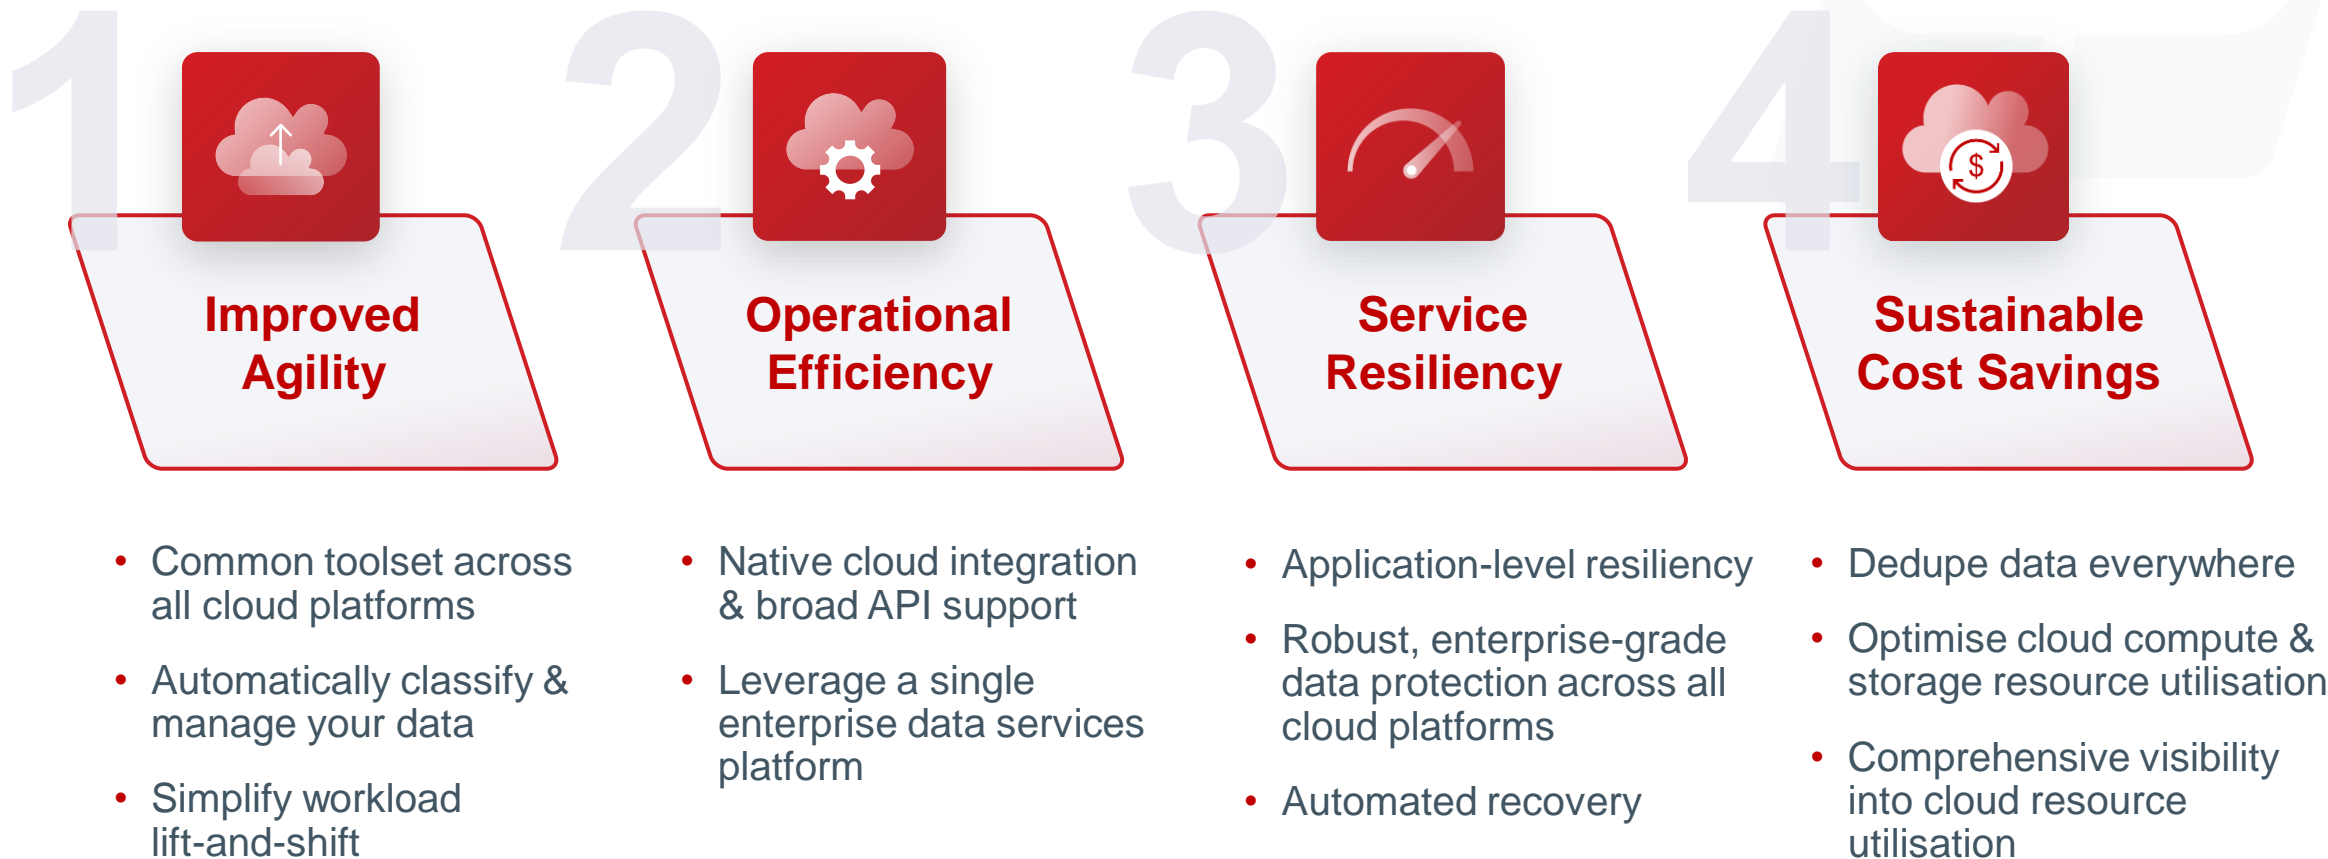

- Capture & archive data from 200+ sources
- Classify, store, retain and dispose of data based on policy, in line with local regulations

Rapid eDiscovery

- Collect data from all relevant data sources
- Filter based on keywords, file types, machine learning & people analysis
- Redact and produce relevant data quickly and easily

Delivering on the promise of multi-cloud

Thank you!
